Key

K Road BID = retailers listed based within the Business Improvement District boundaries.

Key Competitors = The Business Improvement Districts you selected to compare your performance against

All of Auckland Region = The value of spending and transactions at retailers based in Auckland Region

Your Ranking = All BIDs in the Auckland City Council have been ranked based on the change in spending/ transactions and also the total value of spending/ transactions and put into one of four quartile groups. The quartile ranking listed above shows which quartile your BID is in this year and how that relates to last year. Quartile One is the top 25% of BIDs, representing high growth, whereas Quartile Four is the lowest 25% of BIDs, meaning growth has been slow.

About this Page

This page gives an overview of spending and transaction volumes made for the three months ending 31 December 2016 compared to the same period last year. The top section refers to spending in your marketplace, and at your selected competitors. The bottom one measures overall retail spending in Auckland and is based on spending in the last 12 months.

1.A Summary of Changes to K Road

01 Oct 2016 to 31 Dec 2016

1. Spending in the K Road Retail Centre

	Amount Spent			Number of Transactions			Average Transaction Value		
	2016	2015	Change	2016	2015	Change	2016	2015	Change
TOTAL	\$46.08 mn	\$40.51 mn	▲ 13.8%	1.10 mn	1.02 mn	▲ 8.2%	\$41.86	\$39.81	▲ 5.1%

2. Same Store Comparison - spending at K Road merchants that were operating both in this year and last year

	Amount Spent			Number of Transactions			Average Transaction Value		
	2016	2015	Change	2016	2015	Change	2016	2015	Change
TOTAL	\$37.26 mn	\$34.48 mn	▲ 8.1%	0.85 mn	0.88 mn	▼ -3.6%	\$43.93	\$39.20	▲ 12.1%

3. Net change in merchant numbers within the K Road Retail Centre

	2015	2016	* Diff	Change
Automotive	6	5	-1	-16.7%
Core retail	16	11	-5	-31.3%
Food and Liquor	31	35	+4	12.9%

Personal services	8	7	-1	-12.5%
Recreational	7	7	+0	0.0%
TOTAL	215	219	+4	1.9%

Notes

- Overall spending in the marketplace increased by 13.8%
- On a same store basis i.e. merchants active in K Road for all 24 months of the last two years, spending was up by 8.1%.
- We calculate there has been a net change in merchant numbers within the K Road BID of 4 more merchants.

* Change in merchants is the NET change. For example if you have 60 merchants in the first year and 80 merchants in the second year there is a difference of 20. This does not mean that you have had 20 new merchants join; it could be that you have had 40 new merchants join and 20 who have left giving you a NET change of 20.

Frequently Asked Questions

What is the source of the data used in the Auckland Council Regional Spending Database?

The data is primarily sourced from electronic card transactions made via Paymark network at each of the Business Improvement Districts operating within the Auckland Council boundaries. To determine information on the origin and types of customers spending in each market we have used data from BNZ MarketView. Details on both data sources are provide below.

The spending values include GST, but exclude cash out with purchases. Withdrawals from ATMs are not included. Other payment types including cash, HP or automatic payments are also not included.

About Paymark

Paymark operates New Zealand's largest electronic transaction processing network. The company is jointly own by ASB, BNZ, the National Bank and Westpac. Around 70% of New Zealand's eftpos terminals are connected to the Paymark Network. For merchants on the Paymark Network we receive 100% of their electronic card transactions. We use an extrapolation of BNZ cardholder spending for merchants that aren't on the Paymark Network.

BNZ MarketView

BNZ MarketView is based on the eftpos and credit card spending of BNZ card holders in the New Zealand retail market. BNZ has around a 20% market share of the cards business in New Zealand, and typically accounts for approximately 14 - 15% of total spending by value. There are over 700,000 BNZ cardholders. BNZ de-personalises BNZ MarketView data by removing any potential identifiers i.e. names, addresses, account, or card numbers. These are replaced with a unique id, a meshblock number (based on the cardholders home address), and a demographic profile. The cardholder's age and gender are retained, but there is no way of identifying an individual cardholder.

BNZ cardholders they are largely demographically representative of the country and distributed in line with the national population. They also spend everywhere, which includes retailers not on the Paymark network. We are able to BNZ MarketView's share of spending at Paymark merchants to estimate the value of spending at non-Paymark merchants:

Inputs to your Report

What card types are included?

The data is drawn from all card spending using all card types. This includes all Eftpos cards, and all major American Express, Diners Club, MasterCard, Visa Cards. The data will also include electronic gift cards.

How have the Business Improvement District Boundaries been decided?

BID boundaries have been determined by the Council's Business Area Planning team, in consultation with the Research, Investigations and Monitoring Unit.

How is domestic spending determined?

Cards issued in New Zealand are identified in the database. Any transaction made in the Auckland Region, on a New Zealand issued eftpos or credit card, is assumed to be spending made by New Zealanders.

How is international spending determined?

From the Paymark's Market Reporting data it is possible to distinguish between New Zealand cards and cards issued by overseas banks. Overseas cards have a country code. We report the value of spending by the country of origin of the card, and by association, the cardholder.

Does the data include GST?

Yes. NB: From 1 October 2010, GST rose from 12.5% to 15%. This means there is a natural 2.2% increase in spending between periods using the old and new GST rates.
